- Shared public touchscreens are a petri-dish for bacteria.
- Protect both customers and employees from virus transmission with the use of automated UV Cleaning technology to disinfect POS equipment and peripherals.

Temperature Screening Cameras – *Rapid detection of skin-surface temperatures.*

- Fast and safe preliminary screening in public areas with high efficiency in a multitude of scenarios.
- Flexible product choice including “plug and play” for fast deployment with no installation or configuration.

Keep people safe with our cleaning solutions.

Decontamination Fogging - Decontaminate large, regularly used spaces thoroughly and quickly.

- Our team of British Veterans use fogging machines to disperse STERiZAR into the air, and onto all surfaces.
- STERiZAR chemical technology creates an enduring protective shield on all surfaces. This shield actively kills off and destroys 99.99% of bacteria and viruses, including Coronavirus, both in the first instance and throughout the day.

Training and Supply – Train your in-house staff to use this technology. Save on manpower and logistical cost.

- We will either lease or sell fogging machines to you.
- We will supply and deliver STERiZAR fogging fluid and cleaning products at a better than market rate.
