

UV-CLEAN PRODUCT FAMILY

ENSURE YOUR TECHNOLOGY TOUCHPOINTS ARE SAFE FROM VIRUSES & BACTERIA WITH UV CLEAN FOR RETAIL & HOSPITALITY

UV-C light technology is a clinically proven and safe solution utilised in many industries to destroy 99.9% of viruses (including coronaviruses) and bacteria.

ENS have utilised this technology to deliver a family of products to create a safe environment for users of technology touchpoints.

UV-Clean from ENS uses UV-C light technology to disinfect customer and staff technology touchpoints 24/7.

The ROI for UV-Clean over traditional manual cleaning methods is significant. ENS can demonstrate a return on the initial investment within 75 days.

UV-CLEAN PRODUCT FAMILY

TOUCHSCREEN SOLUTION (UV24-MM+)

This solution attaches to the top of a touchscreen monitor either customer or employee facing. The solution is also ideal for Kiosk solutions for screens of up to 24".

The UV24-MM+ automatically disinfects the touchscreen after each user interaction, and has been proven to eradicate 99.9% of surface pathogens.

PAYMENT DEVICE SOLUTION (UV24-PT)

Payment device keypads are used to enter pin numbers. The keys are an ideal surface for viruses and bacteria and should be disinfected after every user. The only practical and effective way to disinfect is the UV24-PT solution which automatically disinfects the keypad after every user.

MOBILE DEVICE SOLUTION (UV24-SA+)

Mobile devices including tablets, mobile payment devices, and inhouse mobile communications are all essential in the retail and hospitality sectors. The UV-Clean Standalone can disinfect multiple devices at one time, providing a consistent cleaning protocol.
